

OPENING & CLOSING MANUAL

A step-by-step guide for opening the cabin safely, protecting equipment, and closing everything correctly before departure.

READ THIS FIRST

Opening the cabin does not take much effort, but the sequence matters. Complete every step in order to avoid damage and ensure the cabin systems are operating correctly. If you are unsure about any step, call the President.

OPENING SEQUENCE

1

LOCATE THE CABIN KEYS

Find the extra set of keys hidden at the property.

★ **IMPORTANT:** Contact the President if you do not know where the keys are located.

2

ENTER AND DISABLE THE ALARM

Unlock the front door. The alarm is in the laundry room to the left of the kitchen. Enter the code and turn the alarm off.

★ **IMPORTANT:** Get the alarm code from the President. Do not repeatedly guess.

3

TURN ON THE WATER

Go outside to the front of the cabin, left of the deck. Open the front access panel and use the water valve hanging inside on the left to turn on the water.

★ **IMPORTANT:** In winter, leave the light bulb on in the access panel to help prevent freezing. Replace the bulb if it is burned out.

OPENING SEQUENCE - CONTINUED

4

TURN ON THE WATER PUMP

Walk to the utility pole near the left rear of the cabin. Open the gray electrical box and turn on the pump.

★ **IMPORTANT:** Both marked switches should be the only switches currently off.

5

TURN ON THE WATER HEATER

Return inside and go to the back bedroom. Open the electrical panel behind the door. Turn on the two red switches.

★ **IMPORTANT:** The two red switches should be the only switches currently off.

6

SET THE HEAT WHEN NEEDED

During cold weather, use the thermostat near the front door to set a comfortable temperature.

★ **IMPORTANT:** When leaving, return the thermostat to 50 degrees F.

7

OPEN THE GARAGE

Open the garage when access is needed. The garage-door keys and recreational-equipment keys are hidden inside the garage.

★ **IMPORTANT:** Ask the President if you do not know the key location.

USING THE FUN STUFF

- Unlock all chains and locks before moving equipment.
- When finished, return everything, lock it up, and resecure all chains.

WAC CABIN OPERATIONS

CLOSING CHECKLIST

When leaving the cabin, complete the shutdown process in reverse order. Confirm every item before departure.

☐	Return and secure all recreational equipment.
☐	Reattach all chains and locks.
☐	Close and lock the garage.
☐	Set the heat to 50 degrees F.
☐	Turn off the water heater.
☐	Turn off the water pump.
☐	Turn off the water.
☐	During winter, confirm the access-panel light remains on.
☐	Secure the cabin and reactivate the alarm.
☐	Return the keys to their proper location.

WINTER PROTECTION

The access-panel light must remain on and working to help prevent freezing. Verify it before departure.

FINAL RULE

If you have questions, call the President. Do not improvise with cabin systems, electrical controls, water equipment, locks, or security.
